

CARINT® can proudly acclaim to be the only Company having the longest tradition in the manufacturing of Flexo Printing Presses for the Packaging Industry. Its name is reknown Worldwide as a Leader for the state of the art equipment. In fact since 1956 the founder and actual President of Carint, Luigi Carraro acquired all his experience working in close relation with his father Attilio to engineer and manufacture the first flexo presses.

Since that time over 3.000 machines have been installed in all five continents, of which at least 80% result as still being in full productivity. The secret of this success is attributable to the choice of dedicating its entire efforts on only one product so that the technologies and working forces were addressed solely to secure the Company's image reknown for quality and reliability. In fact the Company follows the entire productive cycle, starting from the engineering to the manufacture to the marketing and last but not least the after sales assistance and service.

Today Carint has new projects in progress so as to always be in pole position, in fact a new division within the technical department has been created in 1999 called T.R.T. (Technical Research Team). The objective is that this team of highly qualified engineers develop new techniques and applications based on the concept of the machine itself so as to always guarantee prestigious and sophisticated ideas yet trying to maintain simplicity so as to offer our customers the ultimate in the evergrowing needs and requirement of the market.

One of Carint's most significant projects at present is that aimed at applying the concept of rotogravure on its central impression machines, an ambitious and almost revolutionery project. Not to speak of the application of sophisticated electronics and why not of the contiuous study of the optimization in the use of UV inks. What has facilitated Carint in developing these always innovative and researched objectives is the experience and let's say it, the support and trust given throughout these many years of all its customers. We are proud of this long tradition and even with the new generations to come will always conserve this philosophy.

Amongst our innumeros lines of machines certain names have distinguished themselves in particular such as.: Kleina® Gemini®, Discovery®, Miniflex® and the latest SLP®, U.V., Dracoflex®, CYBERFLEX® and SKORPION®.

FLEXO PRESSES

STACK & SLEEVES

KLEINA®

KLEINA 3006 SLV

KLEINA 3008 SLV

Number of printing stations	6	8
Gear Pitch	10 mm - Cp 1/4	10 mm - Cp 1/4
Impression cylinders diam. (inches)	158 mm (6.2")	158 mm (6.2")
Printing combinations	(6+0) (5+1) (4+2) (3+3)	(8+0) (7+1) (6+2) (4+4)
Printing speed (fpm)	200 m/min (660 fpm)	200 m/min (660 fpm)
Printing width (inches)	1000 (39") - 1600 mm (63")	1000 (39") - 1600 mm (63")
Web width (inches)	1050 (41") - 1650 mm (65")	1050 (41") - 1650 mm (65")
Length	8000 mm (approx. 26 feet)	8000 mm (approx. 26 feet)
Height	4100 mm (approx.13 feet)	4100 mm (approx.13 feet)
Anilox roller Ø (inches)	143 mm (5.5")	143 mm (5.5")
Printing repeat (inches) with plate sleeves MIN -MAX	*380 (15") - 1000 mm (39")	*380 (15") - 1000 mm (39")

Note:
The manufacturer reserves the right to carry out technical modifications to its products at any time and without any notice.
*Minimum repeats depend on press maximum width

Motorised positioning of sliding blocks and slides. Quick release of rear support to extract the sleeves.
Fully enclosed doctor blade inking system to guarantee efficiency and highest printing quality. Motorised longitudinal register.

Availability of several configurations of unwinders and rewinders with reel lifting device.
Models available in line with extruders and bag makers.

STACK & SLEEVES

Carint Stack flexo presses are the result of a long tradition of manufacturing. They are suitable to various uses, easy to operate and highly reliable. In order to meet customers' production requirements, Carint has conceived this stack version that uses sleeves on fixed mandrels aboard machine and with frontal removal for a quick set-up and easy management.
It is available in 6 and 8 colours with printing widths up to 1600mm (63").
